MAKIR VOLCY

AI Transformation Consultant — Enterprise AI Strategy & Change Management

AI Roadmapping • Stakeholder Facilitation • Governance Design • Bilingual (EN/FR) Montreal, Canada | +1 (514) 602-5411 | volcy7@gmail.com LinkedIn: linkedin.com/in/makirvolcy | YouTube: youtube.com/@MakirXBT

PROFESSIONAL SUMMARY

Bilingual AI Transformation Consultant (English/French) with 2+ years leading enterprise AI strategy engagements — translating ambiguous mandates like "we should use AI" into concrete transformation roadmaps with governance frameworks, success metrics, and change management built in. Founded Coldstorm AI to deliver end-to-end AI consulting for enterprise and SMB clients across financial services, professional services, and technology verticals. Equally comfortable sketching an operating model on a whiteboard with a CFO and debugging a Python script with an analyst. Background combines computer science fundamentals (McGill Software Development) with business technology management (Concordia B.Comm) and hands-on experience at Tier-1 financial institutions including National Bank of Canada, Keyrock, and Binance. Proven ability to lead structured discovery workshops, facilitate senior stakeholder alignment, and design scalable delivery methodologies that enable organizations to ship AI automation with enterprise-grade governance.

CORE COMPETENCIES

AI Transformation & Strategy AI Readiness Assessments, Transformation Roadmapping, Operating Model Design, Governance Framework Development, ROI Analysis & Business Case Development, Success Metrics & KPI Design, Change Management, Citizen Builder Enablement

Consulting & Stakeholder Management Executive Workshop Facilitation, Structured Discovery & Problem Framing, Senior Stakeholder Alignment, Business-to-Technical Translation, Client Relationship Management, Cross-Functional Collaboration, Presentation & Communication

Technical Foundations Python, SQL, REST APIs, Claude AI / Anthropic API, GPT, Prompt Engineering, AI Agent Development, RAG Systems, Automation Pipelines (n8n, custom), Data Analysis, Web Scraping, Shell Scripting

Enterprise AI Implementation LLM-Powered Automation, Agentic Workflow Design, AI Chatbots & Voice Agents, CRM Integration, Production Deployment (Docker, Linux, Cloud), Evaluation Frameworks, Safety & Compliance Guardrails

Financial Services Domain Institutional Trading Operations, Market Surveillance & Compliance, Risk Management Systems, AML/KYC Frameworks, Regulatory Reporting, Financial Modeling

Languages English (Native) | French (Native/Bilingual) | Spanish (Working Proficiency)

PROFESSIONAL EXPERIENCE

Founder & AI Transformation Consultant

Coldstorm AI • Montreal, Canada • January 2024 – Present

Boutique AI consulting practice delivering enterprise AI transformation strategy, automation roadmapping, and hands-on implementation for clients across financial services, professional services, and technology verticals.

- **Led end-to-end AI transformation engagements for 5 enterprise and SMB clients**, driving structured discovery with senior stakeholders to define where AI automation creates strategic value — turning vague "we want AI" mandates into concrete roadmaps with governance, metrics, implementation timelines, and change management plans.
- **Conducted AI readiness assessments translating complex business requirements into actionable technical specifications**, evaluating organizational maturity, data infrastructure, process bottlenecks, and automation opportunities — delivering executive-ready transformation roadmaps with ROI projections and prioritized initiative sequencing.
- **Facilitated executive workshops and stakeholder alignment sessions** for non-technical leadership, translating AI capabilities into business strategy, building organizational buy-in, and designing governance frameworks that enable teams to ship automation with enterprise-grade controls.
- **Designed and delivered scalable delivery methodologies** including standardized assessment frameworks, evaluation criteria, and operating models that enable "citizen builders" within client organizations to adopt AI tools with proper governance, compliance, and quality guardrails.
- **Implemented production AI automation systems** including intelligent chatbots, AI voice agents, lead qualification systems, and workflow automation — reducing manual operational workload by 60–80% for clients while maintaining compliance and data governance standards.
- **Built multi-agent AI systems orchestrating 5+ specialized agents** for autonomous business operations (content production, market intelligence, client communications, operational monitoring) — demonstrating deep technical fluency alongside consulting delivery.
- **Developed a proprietary agent design methodology** emphasizing experiential identity architectures over procedural instruction sets, achieving higher agent autonomy and production reliability — an approach directly applicable to enterprise automation framework design.
- **Managed full project lifecycle from discovery through production deployment**, including requirements gathering, solution architecture, implementation, testing, stakeholder sign-off, training, and ongoing optimization — delivering on time and within scope.

Founder & CEO

NRG Bloom Inc. • Montreal / Nigeria • 2023 – Present

- **Designed AI-powered operating models** for international operations across Nigeria, Kenya, and Colombia — deploying automation for investor communications, content production, supply chain monitoring, and cross-border stakeholder management.
- **Architected $82M+ in financial models** using Python and advanced Excel for investor presentations, demonstrating the analytical rigor to translate complex business scenarios into structured, data-driven deliverables for senior stakeholders.
- **Led cross-functional stakeholder management** across government agencies, investors, suppliers, and technical teams in emerging markets — navigating ambiguity, cultural complexity, and regulatory requirements to advance strategic objectives.

Market Surveillance Investigator

Binance • Remote • March 2023 – December 2024

Tier-1 global financial institution (150M+ users, largest digital asset exchange by volume)

- **Led structured investigations across spot and derivatives markets**, processing 100+ daily surveillance alerts and producing evidence-based investigation reports under strict SLA compliance — demonstrating systematic problem-solving and analytical rigor at institutional scale.
- **Pioneered investigation methodologies achieving a 23% reduction in platform-wide fraudulent activity** through structured process design, cross-functional collaboration with engineering and compliance teams, and systematic escalation frameworks.
- **Designed and delivered an end-to-end training program** for new team members covering investigation methodology, tooling, evidence documentation, and reporting standards — achieving 73% positive feedback and demonstrating workshop facilitation and knowledge transfer capabilities.
- **Collaborated on optimizing enterprise surveillance systems**, backtesting detection parameters and reducing false positive rates by 10% — translating business requirements into technical improvements for production systems.
- **Engineered custom Python scripts and SQL queries** for automated data analysis, pattern detection, and reporting — bridging the gap between technical implementation and business intelligence needs.

Algorithmic Trader & Market Maker

Keyrock • Brussels, Belgium • May 2020 – May 2021

Tier-1 institutional digital asset market maker

- Managed $10M+ daily liquidity across 4 major exchanges, operating within institutional-grade risk governance frameworks with real-time automated controls, compliance reporting, and performance metrics.
- Developed real-time risk management systems with automated circuit breakers, dynamic spread adaptation, and position sizing — production systems requiring precision, governance, and safety controls.

Financial Advisor

National Bank of Canada • Montreal • 2020 – 2021

Tier-1 Canadian financial institution

- Delivered client-facing financial advisory services including portfolio management, financial planning, and investment recommendations — developing stakeholder management skills in a regulated financial services environment.
- Managed client relationships requiring trust, structured communication, and the ability to translate complex financial concepts into clear, actionable guidance for non-technical audiences.

Earlier Experience

Digital Asset Investigator — Coldstorm Group (2018–2023): Forensic blockchain analysis, asset tracing, compliance advisory, law enforcement collaboration. **Trading Operations** — Secure Digital Markets (2019–2020): Institutional client onboarding, OTC execution, operational process design.

SELECT TRANSFORMATION & AUTOMATION PROJECTS

- **Enterprise AI Transformation Roadmaps** — End-to-end AI readiness assessments, stakeholder workshops, and transformation roadmaps for 5 clients across financial services, professional services, and technology — with governance frameworks, ROI metrics, and change management plans.

- **Multi-Agent Business Automation System** — Designed and deployed a 5-agent autonomous operating system for enterprise business operations, demonstrating scalable automation methodology with production governance and monitoring.
- **AI-Powered Client Communication Systems** — Production chatbots, voice agents, and intelligent receptionist systems with CRM integration, compliance guardrails, and quality evaluation frameworks — reducing manual workload by 60–80%.
- **Automated Lead Intelligence Pipeline** — Full-stack automation: discovery → data extraction → AI analysis & scoring → personalized output. 50+ qualified results/week, demonstrating the ability to design repeatable, governed automation workflows.

KEY ACHIEVEMENTS

- **5 enterprise clients** delivered end-to-end AI transformation with governance frameworks and measurable outcomes
- **60–80% reduction in manual workload** through structured automation deployment with enterprise-grade controls
- **23% reduction in fraudulent activity** at Binance (150M+ users) via systematic methodology design
- **$82M+ financial models** architected for investor-grade stakeholder deliverables
- **73% positive feedback** on training program design and delivery
- **Bilingual delivery** of all consulting engagements, workshops, and stakeholder presentations in English and French

---

EDUCATION & CERTIFICATIONS

- **B.Comm, Business Technology Management** — Concordia University, John Molson School of Business, Montreal (2012–2016)
- **Certificate in Software Development** — McGill University, Montreal (2017–2018)
- **AML, KYC & Compliance Certification** — Binance (2023)

THOUGHT LEADERSHIP

YouTube Channel (youtube.com/@MakirXBT) — Content on AI transformation strategy, agent development, and applied AI for business — demonstrating ability to communicate complex AI concepts to diverse audiences.

Bilingual Consulting Delivery — All client engagements, executive workshops, transformation roadmaps, and stakeholder presentations delivered in both English and French.
